Youth Academy Information

The purpose of the **soccer academy** is to introduce the concepts of sound technical skills coupled with team tactical execution. Skills such as controlling, passing, heading, dribbling and defending are taught. The ability to move to open spaces and working together towards a common goal are emphasized in this team sport. A balance between individual play and team play are stressed. The player is encouraged to experiment and deploy their newly learned techniques in small sided games during each clinic. This reinforces the creativity and learning that takes place during the skills sessions. As these young players head toward their goal of playing select soccer they will have the opportunity to train with some of the top coaches in weekly skills clinics. So bring your budding soccer player out for some fun while learning excellent soccer skills.
